Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner telephoned Mr. Swanson to discuss a potential new matter issue with the specification and certain claims. It was suggested that the particle size range of claims 23 and 32 should be changed to read "0.1 to 5 microns" and to add the term "about" before "0.2" and "3" in claims 24 and 33. Specification was to be amended to include the same particle size range. Mr. Swanson agreed to all suggestions and it was decided to have the amendments done by an Examiner's Amendment (attached). . .
